

“70% of businesses that suffer a major data loss are out of business within 18 months” *DTI*

Will your business
be one of them?

integral
IT Support for Business

"90% of your employees would download something onto their work PC even though they wouldn't install it at home"
fastcorporateservices.com

Most businesses are at risk due to inadequate systems protection:

DATA LOSS – where a systems failure wipes essential business or customer information from your computer.

VIRUS RISK – where hackers and information thieves break through insecure internet connections and steal or corrupt confidential information.

Protect Yourself From Risk For Free

We help businesses prevent and solve these sorts of problems.

As a way of getting to know more local businesses, we're offering a free, no-obligation "IT Health Check".

We'll visit you at your premises, look at your IT setup and advise you how to:

- **Safeguard your data**
- **Block the latest viruses**
- **Increase the speed of your PCs**
- **Safely share data between your computers**
- **Securely access your email from outside the office**

This service is free and there's no hard sell. We're using it to build our reputation locally so we're happy to spend the time with you in the hope that you'll remember us if you ever need IT Support.

To book an IT Health Check, please call us before 20th February and we'll arrange a mutually convenient time to visit you.
